

Premium Milkers Premix plus Zinc

Advantages

SUPERIOR ANIMAL HEALTH

DESIGNED FOR OVER THE SUMMER

POSITIVE DCAD MINERALS

EASY TO USE

OPTIMAL IMMUNITY

Significant hormonal and digestive system changes are involved in producing milk. These changes put a cow under additional pressure, increasing the need for key nutrients such as calcium, magnesium and salt, in order to help meet the demands of a high producing dairy cow.

AGVANCE MILKERS PREMIX PLUS ZINC

Agvance Milkers Premix plus Zinc delivers a comprehensive mineral formulation, including calcium, magnesium & salt, to support the cow throughout lactation. This is especially important when cows are feeding on a supplementary feed such as maize silage.

TECHNICAL INFORMATION

Daily Dose Rate

Agvance Milker Premix can be fed at 200g/cow/day (based on average 500kg cow). Consult your nutrition specialist or vet for specific advice.

Dosage Methods

Mixer wagon

Feedout wagon

BENEFITS

Part of your Facial Eczema prevention plan.

Avoid mineral deficiency. Maintain balanced nutrition throughout the summer and autumn with a blend optimised for warmer months.

Scientific Trials show KemTRACE Chromium effectiveness against heat stress, plus production benefits.

DAIRY COW TRACE ELEMENT BLEND

Element	Elemental levels
Calcium	45mg
Magnesium	11mg
Sulfur	107mg
Cobalt	17mg
Chromium Kemtrace	8mg
Zinc**	10,290mg
Chloride	21.6mg
Sodium	14mg
Excential MBA	12mg
Copper	140mg
Selenium total	8.4mg
<i>Se (Lipid Coated)</i>	6.2mg
<i>Se (Non Organic)</i>	2.2mg
Iodine	8.7mg
Boron	54mg
Net Bag Weight	25kg
