

# Premium Loose Lick SI

Designed for lactating and dry cows, youngstock and beef cattle. Contains effective mineral levels that aid in metabolism, prevention of metabolic disease, energy utilisation, body condition and the maintenance of blood and liver mineral levels.

## WHY USE A LOOSE LICK

Loose licks are a very cost efficient way of offering a general mineral blend to animals fed on pasture or forage crops. They are an easy and simple option of providing a macro mineral and trace element supplement to the herd.

## PREMIUM LOOSE LICK ELEMENTAL BLEND

- **Salt** – to balance mineral levels in crops and pasture aiding in metabolism and the prevention of metabolic disease.
- **Effective Magnesium** – high quality magnesium used in maintaining blood magnesium levels and helping to prevent metabolic disease.
- **Copper Plexomin Chelate** – a high quality chelate providing a high quality organic copper supplement. This helps to build / maintain copper levels in the liver and blood, and supports the health of the animal.
- **Zinc** – maintains / boosts the immunity of the animal through times of stress (wet/cold conditions and late stages of pregnancy).
- **Iodine** – in highly available EDDI form, helps to maintain iodine levels while on goitrogenic crops. Aids metabolism and is important in preparing the cow for the calving period.
- **Selenium** – supports maintenance of blood selenium levels going into the calving period.
- **Chromium** – aids energy metabolism by helping a cow efficiently use the energy she is eating to increase body condition.

## PREMIUM LOOSE LICK ELEMENTAL BLEND

Element	Elemental Levels
Magnesium	5g
Sodium	6g
Copper Plexomin Chelate	80mg
Zinc Sulphate	450mg
Cobalt	7mg
Iodine	7mg
<b>Selenium total</b>	<b>6mg</b>
<i>Se(Lipid coated)</i>	<i>4mg</i>
<i>Se(Non organic)</i>	<i>2mg</i>
Boron	48mg
Chromium - Kemtrace	4mg
Sugar	1g
Chloride	11g
Palamon	Flavouring
Dose Rate	40g/cow/day
<b>Net bag weight</b>	<b>25kg</b>
