

Premium Standard Loose Lick Winter

Designed for lactating and dry cows, youngstock and beef cattle. Contains effective mineral levels that aid in metabolism, prevention of metabolic disease, energy utilisation, body condition and the maintenance of blood and liver mineral levels.

WHY USE A LOOSE LICK

Loose licks are a very cost efficient way of offering a general mineral blend to animals fed on pasture or forage crops. They are an easy and simple option of providing a macro mineral and trace element supplement to the herd.

LOOSE LICK STANDARD WINTER ELEMENTAL BLEND

- **Salt** - to balance mineral levels in crops and pasture aiding in metabolism and the prevention of metabolic disease.
- **Effective Magnesium** - high quality magnesium used in maintaining blood magnesium levels and helping to prevent metabolic disease.
- **Copper Plexomin Chelate** - a high quality chelate providing a high quality organic copper supplement. This helps to build / maintain copper levels in the liver and blood, and supports the health of the animal.
- **Zinc** - maintains / boosts the immunity of the animal through times of stress (wet/cold conditions and late stages of pregnancy).
- **Iodine** - in highly available EDDI form, helps to maintain iodine levels while on goitrogenic crops. Aids metabolism and is important in preparing the cow for the calving period.
- **Selenium** - supports maintenance of blood selenium levels going into the calving period.
- **Chromium** - aids energy metabolism by helping a cow efficiently use the energy she is eating to increase body condition.

LOOSE LICK STANDARD WINTER ELEMENTAL BLEND

Element	Elemental levels Typical Analysis Mg's per dose
Magnesium	5.5g
Sodium	7.6g
Copper Plexomin Chelate	80mg
Zinc Sulphate	450mg
Cobalt	7.3mg
Iodine	7.1mg
Selenium total	6mg
<i>Sodium Selenate</i>	<i>2.4mg</i>
<i>Coated Selenium</i>	<i>3.6mg</i>
Boron	48mg
Chromium - Kemtrace	4.7mg
Sugar	1.1g
Chloride	11.8g
Dose Rate 25kg net bag weight	40g/cow/day
