

Game changer for transitioning cows at the run-off or on grass systems.

ELEMENTAL LEVELS

	per dose	Based on 350g intake
Calcium	29g	
Magnesium	16g	
Chloride	23g	
Sulfur	20g	
Cobalt	15mg	
Iodine	8mg	
Selenium total	7mg	
Coated Selenium	5mg	
Sodium Selenate	2mg	
Copper	125mg	
Zinc	301mg	
Sodium	6g	
Rumen Buffer	43g	
Sugar	4g	
Net weight: 25kg bag		DCAD -4500 meq

DOSAGE METHOD

- Free choice in PK trailer or in bins on the break
- Fed out on silage

Recommended dose:
325g - 400g/cow/day

0800 BALANCE
agvance.co.nz

FEATURES

- Delivers mineral salts in negative DCAD form
- Supports rumen function and higher levels of available energy in early lactation

BENEFITS

- A flexible product that can be used at run-off
- Help prevent metabolic disease
- Help ensure optimum mineral levels
- Improve immune function
- Maximise cow's ability to combat oxidative stress and reduce inflammation
- Increase cow's efficiency in releasing and absorbing calcium and phosphorus from the diet
- Highly palatable free choice
