

Game changer for transitioning cows at the run-off or on grass systems.

ELEMENT ELEMENTAL LEVELS

per dose

Calcium	29g
Magnesium	16g
Chloride	23g
Sulfur	20g
Cobalt	15mg
Iodine	8mg
Selenium total	7mg
Coated Selenium	5mg
Sodium Selenate	2mg
Copper	125mg
Zinc	301mg
Sodium	6g
Rumen Buffer	43g
Sugar	4g

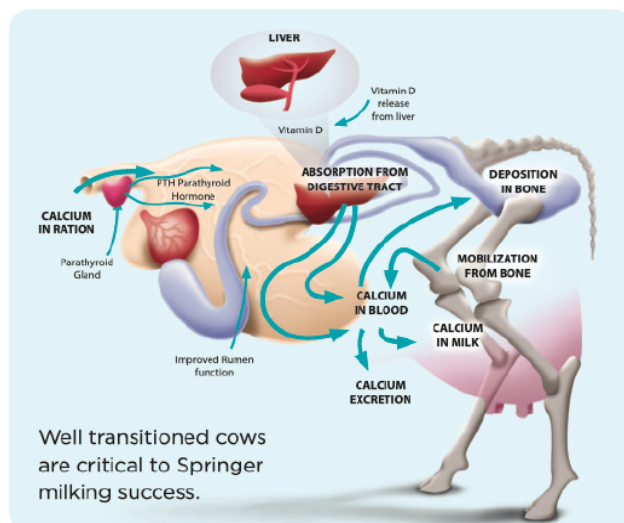

Net weight: 25kg bag

DOSAGE METHOD

- Free choice in PK trailer or in bins on the break
- Fed out of silage

Recommended dose:
325g - 400g/cow/day

0800 BALANCE
agvance.co.nz

FEATURES

- Delivers mineral salts in negative DCAD form
- Supports rumen function and higher levels of available energy in early lactation

BENEFITS

- Help prevent metabolic disease
- Help ensure optimum mineral levels
- Improve immune function
- Maximise cow's ability to combat oxidative stress and reduce inflammation
- Increase cow's efficiency in releasing and absorbing calcium and phosphorus from the diet
