

**Power down DCAD,  
power up calving.**

With a negative DCAD to support calcium balance, this easy-to-use premix helps reduce milk fever risk, improve feed intake, and boost energy levels - setting cows up for a smoother calving, faster recovery, and a stronger start to lactation.

## ELEMENT ELEMENTAL LEVELS

per dose Based on  
200g intake

Calcium	17g
Magnesium	15g
Chloride	54g
Zinc (org)	340mg
Cobalt	20mg
Iodine	21mg
<b>Selenium total</b>	<b>8mg</b>
Coated Selenium	6mg
Sodium Selenate	2mg
Copper	150mg
Zinc	600mg
Chromium	8mg
Manganese	25mg
Bovatec	300mg
Boron	102mg

Net weight: 25kg bag DCAD -13543 meq

## BENEFITS

- **Prevents milk fever:** Anionic salts help lower the risk of milk fever by supporting calcium metabolism.
- **Improves calcium mobilization:** Encourages calcium release from bones to maintain healthy blood calcium levels.
- **Supports immune function:** Balanced calcium levels help cows fight off infections more effectively.
- **Promotes better appetite post-calving:** Cows are more likely to eat well after calving, reducing the risk of metabolic disorders.
- **Boosts reproductive performance:** Fewer metabolic issues can lead to better fertility in the next lactation.

## DOSAGE METHOD

- Mixer/Feed Wagon
- Fed out over silage
- **Recommended dose:**  
200g/cow/day

**0800 BALANCE**
