

Set your cows up well by supplementing your colostrum herd to get the best gain in early lactation.

ELEMENT ELEMENTAL LEVELS

	per dose	Based on 150g intake
Calcium	19g	
Magnesium	9g	
Chloride	15g	
Sulfur	4g	
Cobalt	19mg	
Iodine	10mg	
Selenium total	10mg	
<i>Coated Selenium</i>	<i>6mg</i>	
<i>Sodium Selenate</i>	<i>4mg</i>	
Copper	160mg	
Zinc (org)	390mg	
Sodium	8g	
Rumen Buffer	40g	
Vit E	400 I.U.	
Sugar	4g	

Net weight: 25kg bag

FEATURES

- Rumen-protected selenium to help reduce oxidative stress and improve liver function
- High in calcium and magnesium
- Rumen buffer to assist with diet transition and sub-acute ruminal acidosis (SARA)
- Adequate level of trace elements

BENEFITS

- Reduces metabolic disease post calving
- Ensures better weight gain
- Improves productivity and fertility
- Ensures good rumen function that drives production
- Reduces inflammation and increase immune function

DOSAGE METHOD

- In PK trailer or in bins on the break

Recommended dose: 150g - 200g/cow/day
