

Optiprill Rumen Plus SI is a well-balanced lactation mineral supplement containing essential minerals- calcium, magnesium, and sodium - along with premium trace minerals and a rumen buffer to support long-term digestive health. The rumen buffer helps reduce the risk of SARA (sub-acute ruminal acidosis) by stabilizing rumen pH. This supplement is ideal for high-producing herds grazing high-ME (metabolisable energy) pastures or undergoing significant dietary changes. The prilled format flows smoothly through in-shed feeding systems and creates minimal dust, making it easy to use. It tastes great and cows love it.

Typical Analysis per specified dose

ELEMENTAL DATA	PER 190g DOSE	PER 205g DOSE
Calcium	50g	55g
Magnesium	15g	14g
Phosphorus		8g
Sodium	3g	4g
Chloride	6g	5g
Copper	130mg	130mg
Selenium Total	10mg	10mg
SE (Lipid Coated)	6mg	6mg
SE (Non Organic)	4mg	4mg
Iodine	12mg	12mg
Zinc Sulphate	750mg	750mg
Cobalt	12mg	12mg
Chromium (Org)	8mg	8mg
Boron	80mg	80mg
Sugar	3g	4g
Bovatec (Lasolocid)*	300mg	300mg
Rumen Buffer	47g	49g
