

Optiprill Rumen Plus SI is a well-balanced lactation mineral supplement containing essential minerals- calcium, magnesium, and sodium - along with premium trace minerals and a rumen buffer to support long-term digestive health. The rumen buffer helps reduce the risk of SARA (sub-acute ruminal acidosis) by stabilizing rumen pH. This supplement is ideal for high-producing herds grazing high-ME (metabolisable energy) pastures or undergoing significant dietary changes. The prilled format flows smoothly through in-shed feeding systems and creates minimal dust, making it easy to use. It tastes great and cows love it.

Typical Analysis per specified dose

ELEMENTAL DATA	
Calcium	55g
Magnesium	15g
Phosphorus	
Sodium	4g
Chloride	6g
Copper	130mg
Selenium Total	10mg
SE (Lipid Coated)	6mg
SE (Non Organic)	4mg
Iodine	12mg
Zinc Sulphate	750mg
Cobalt	12mg
Chromium (Org)	8mg
Boron	80mg
Sugar	3g
Monensin	300mg
Rumen Buffer	47g
