Swine, Poultry, Ruminants and Aqua / Gastrointestinal Health

 Make your future more competitive

 ENHALOR
DO EVERYTHING FOR BEAUTIFUL LIFE

Our products cover more than 70 countries and regions around the world

Product Profile

Product description

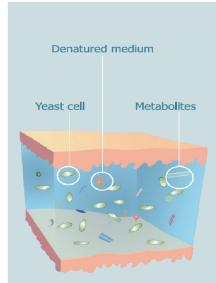

- Biyeastar 4C is a kind of yeast culture, and a natural combination of yeast metabolites that work together to support health and performance in monogastric, ruminant animals and aquaculture. Yeast culture has been used as an ingredient in various animal dietary feed.
- Biyeastar 4C is manufactured using patent yeast S-10 (*Saccharomyces cerevisiae*) fermentation technology that includes liquid and solid anaerobic fermentations to generate unique functional metabolites, and dried with the media on which it was grown.
- Biyeastar 4C is more concentrated than Original Biyeastar, low dosage of Enhalor Original Product. It is a nutritional feed ingredient designed for further manufacture of nutritionally balanced feeds for all classes of livestock, poultry, aqua and pets. General feeding recommendations are outlined on last page.

How does Biyeastar work?

- Balances immune function and improves gut health
- Antioxidant activity
- Improves beneficial bacteria via prebiotic activity
- Increases intestinal villi height and density
- Improves nutrient digestibility

Guaranteed analysis

Crude Protein	≥20%
mannan	≥2%
Crude Ash	<11%
Moisture	<10%

Physical characteristic and handling

Biyeastar 4C is a granular material with flowable characteristic. The nutritional value is not affected by standard manufacturing processing methods or environmental temperature fluctuations.

Shelf Life: 18 months from date of manufacture
